## About The Medic Portal Courses

### Mastering the UKCAT Course

Our intensive 1-day course will provide students with a comprehensive overview of each assessed section of the UKCAT.

Students will leave with an understanding of proven strategies to master the UKCAT, including time management. Interactive hand-held devices will be provided to the students to work through questions in real-time throughout the day. The system will enable students to track their own performances against their peers in an anonymous setting and ensures everyone gets to participate continuously throughout the day.

All students attending the course will receive a detailed workbook to fill in on the day and subsequently use for revision up until the day of the test.

**In 2017, 1 in 2 of all UKCAT takers used The Medic Portal to prepare for their UKCAT.** Across 2016 and 2017, 99% said they would recommend it to a friend, and 98% said they felt better prepared from the exam after the course (sample size: 1000+). Our 2016 study followed the outcomes of 100 UKCAT Course attendees, which showed an average score that was **3 deciles higher** than the national UKCAT average - in the **top 20%** of marks!

### Mastering the BMAT Course

Put together by First Class Oxbridge graduates, scientists and practising doctors, and used by top name schools across the UK and overseas, our 1-day BMAT course covers each of the three examined sections of the BMAT. Our highly interactive course provides the knowledge and framework to excel at this difficult aptitude test. Students will be able to track their performances across all three sections against their peers as each student works through practice questions through the day. With The Medic Portal's trademark approach to tackling the BMAT essay, and proven methodologies for both the aptitude and science sections, students will leave the course feeling more prepared than before.

All students attending the course will receive a detailed workbook to fill in on the day and to take away from the session.

In a survey of our BMAT Courses in 2017, **99%** of our attendees said that they would rate the course 'very good' or 'excellent' in quality – and **98%** felt better prepared for their exam afterwards. How did our tutors perform? **98%** of our attendees rated the TMP tutor leading their BMAT Course last year as 'very good' or 'excellent'.

### Mastering the Interview Course

This comprehensive 1-day course fully prepares students for the 3 interview types - Traditional, MMI & Oxbridge. Students will learn how to excel at topics such as Medical ethics, current NHS issues, work experience undertaken, motivation to study Medicine and much more. Attendees can expect to benefit from systematic approaches to MMI stations and the one-to-one interview style, compiled from The Medic Portal's years of experience helping students excel at their Medical School Interviews.

Students attending this course will receive a highly-detailed 20,000-word revision booklet, providing a breadth of information and updated content, including mark schemes and discussions on Medical Ethics and NHS hot topics to revise from up until the day of the interview. *\*The course is designed for Medicine applicants but is also suitable for Veterinary Science and Dentistry Applicants who will gain transferable interview skills from the course.*
